

RESPONDING TO CLIMATE CHANGE (modifying an action)

Seek to meet as many principles as possible.

	Your decision
Can the action be made more flexible?	
Can the action be made more reversible?	
Can the action be modified to keep more options for the future?	
Can the action increase the safety margin?	

Can you reduce the timeframes of the action?	
Can you make the action robust to multiple futures?	

PRIORITISING RESPONSES

	Response 1	Response 2	Response 3
Implementable – costs are not too high and organisation has capacity			
Flexible and maintains future options			
Reduces time horizons of decisions			
Does not exacerbate climate change e.g. increase emissions			
Includes learning
