

IMPLEMENT TO LEARN CHECKLIST

Implementation	
Who is the responsible project owner?	
What are the project implementation timeframes?	
What are the reporting mechanisms?	
Implementation to learn	
What is the monitoring frequency of the decision?	
What are the adaptation commitments that have been made that need to be monitored?	
Learning	
What changes that occurred between business case and implementation -scope, budget, process – that might have increased the risk to climate change?	
What challenges arose in terms of ensuring this decision responded to climate change?	
Have any climate events occurred to see how your decision fared? (short term effectiveness)	
With more information now, should any of your original assumptions about climate change be modified?
