

Which and how do changes in climate variables interact with the planning objectives?

| Climate variable | Fair, orderly, economic, and sustainable use and development of land | To protect natural and man-made resources | To provide a pleasant, efficient and safe working, living and recreational environment | To conserve and enhance those unique buildings, areas or other places | To protect and provide public utilities and other assets | To balance the present and future interests of all Victorians |
|-------------------------|---|--|---|--|---|--|
| Average temperature | | | | | | |
| Extreme temperature | | | | | | |
| Average rainfall | | | | | | |
| Extreme rainfall | | | | | | |
| Drought | | | | | | |
| Sea level rise | | | | | | |
| Bushfires | | | | | | |
| Wind | | | | | | |

Which and how do changes in climate variables interact with the components of your decision?

| | Drainage and water management | Utilities | Land use | Expected tree planting | Roads |
